

Forgo the use of medications to Mask your underlying condition. TMS has the proven capability to help you regain your truly own biological rhythm and restore your own neurological pathways. TMS is not a miracle cure, it is a non-invasive advanced form of neuro stimulation used to re-engage certain areas of your Brain's neurological pathways and restore vital connections to reach an equilibrium, creating a feeling of normalcy and a return to "You."

How transcranial magnetic stimulation works

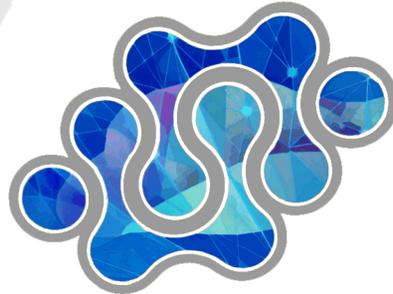

Researchers are exploring what the noninvasive technique can teach them about autism, and whether it could be a treatment.
